

# THE GP PATIENT SURVEY

Key results April 2010 – March 2011 for  
FALLODON WAY MEDICAL CENTRE (L81131)

## Technical Details of the GP Patient Survey April 2010 – March 2011

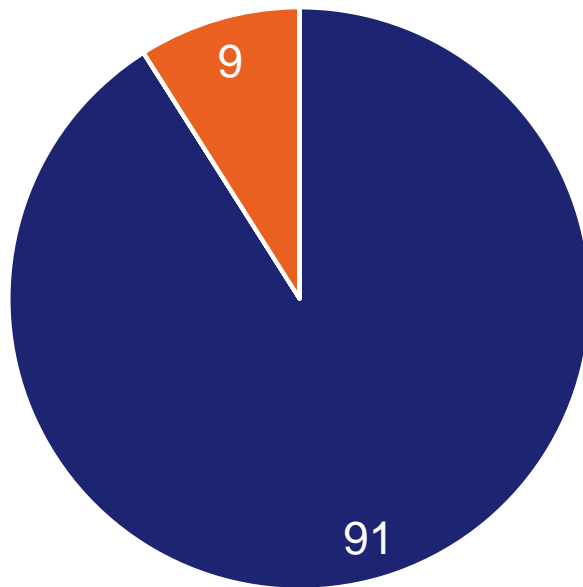

- Ipsos MORI administers the GP Patient Survey on behalf of the Department of Health (DH). Every quarter, a different sample of adult patients registered with a GP will receive a questionnaire, with reminder mailings being sent in the two months following each quarterly mailing. Patients are able to complete the survey on paper, online or by phone, including in 13 other languages and British Sign Language.
- This document shows this practice's results for a number of key questions from the survey. The results in this report are based on data collected between April 2010 and March 2011 (i.e. quarters 1-4 of the 2010/11 survey combined), and is compared with results from previous years where possible. Pages 3-10 also provide PCT and national comparisons.
- The current overall response rate to the survey is 36%, based on 1,994,410 completed surveys.
- 523 questionnaires were sent to adult patients registered with this practice (L81131), and 284 were returned completed. The response rate for this practice is 54%. The number of patients who were sent questionnaires was determined individually for each practice (further details on this can be found in the survey technical report).
- Computer rounding means that combined percentage scores are not always the sum of the individual percentage scores, e.g. the total percentage 'satisfied' will be calculated from the actual number of patients answering 'very satisfied' and 'fairly satisfied', and not the sum of the two percentage results.
- Where results do not sum to 100, this is due to multiple responses or computer rounding. An asterisk (\*) indicates a percentage of less than 0.5% but greater than zero.

Please note that before April 2010, only patients who said they had seen a practice nurse in the past six months were asked how easy it was to get an appointment. However, from April 2010, all patients were asked about ease of getting an appointment with a nurse. The results presented here are based on data from April 2010 - March 2011 only and are therefore not comparable with previous results for this question.
